

Space as a Service for Humankind

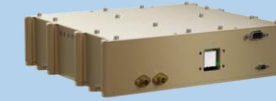

- ❑ Reliasat Vision: Open the Space for innovative business opportunities and disruptive technological developments for the present and future of humankind.
- ❑ Offering: Reliasat provides state of the art engineering solutions that integrates our innovative proprietary diversified portfolio of space technologies and disruptive business solutions to support the orbital space commercialization
- ❑ Our software-defined (SDR) telecom solutions enable the realization of regenerative and non-regenerative smart communication satellites, including channelizers, inter-satellite links, routing in space, digital beamforming and beam hopping
- ❑ Industry leading capabilities in Communication (LEO/MEO/GEO), EO , In-orbit services and deep space mission solutions
- ❑ Locations: Montreal (Canada), Harwell (UK) Jakarta (Indonesia) and N. Delhi / Bengaluru (India)
- ❑ CONTACT INFO:

Satellite platforms for communications, Earth observation and SAR

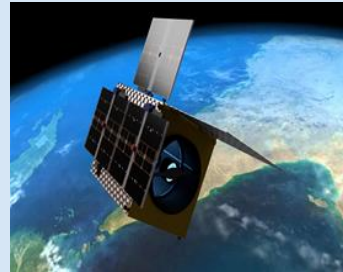

In orbit Services, Life extension)- (GEO Cube sat)

Providing Optical/FSO Communication Solutions

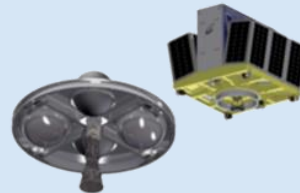

Propulsion Systems: HEET's and Plasma-Ion-Thrusters

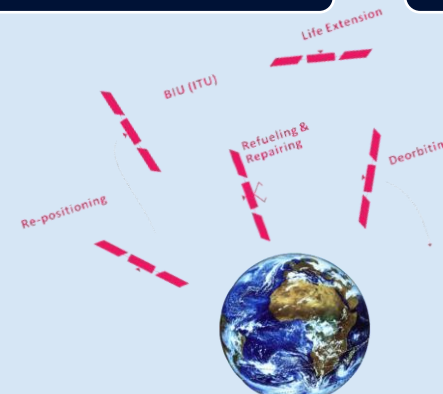

AI-VHR Remote Sensing Solutions (Optical and SAR)

Locomotive systems for Rovers for Earth and Lunar orbits

Expendable Orbital Vehicles (Space Tugs and Transfer Stages)
